

CIRCULAR ECONOMY CHARTER

Being eco-responsible is about being in the loop

Eiffage's goal: to preserve natural resources and to optimise waste management

How?

- By evaluating and reducing our primary material needs at the root
- By opting for recycled reused materials
- By being exemplary waste management handlers: sorting and traceability
- By promoting our recycling and overhaul services to our customers
- By involving our suppliers
- By acting as model waste management handlers: sorting and traceability

1 Eco-designing our work to reduce consumption of materials

- Sourcing renewable and recyclable materials from our suppliers
- Training business partners on eco-design
- Innovating to achieve more evolutive output
- Improving the lifespan of our output

2 Committing to reusing and making the most out of waste

- Measuring and limiting waste production
- Opting for reusing and recycling
- Making the most out of our expertise in waste recycling and in adding value to polluted soils
- Developing our selective dismantling activities

3 Sharing and raising awareness about all best practices within the Group

- Creating new primary materials from waste
- Sharing feedback and initiatives within the Group
- Supporting initiatives in the field
- Presenting the circular economy as an innovative asset in our business offers
