### **Eiffage and ENGIE Solutions win Saint-Brieuc bay offshore substation contract in France**

Eiffage, through its subsidiary Eiffage Métal, as part of a consortium with ENGIE Solutions has been awarded by Ailes Marines the contract for the construction of an offshore substation for the Saint-Brieuc bay offshore wind farm in Brittany, France.

Ailes Marines, a company owned by Iberdrola - top renewable energy producer in Europe and the United States and world's leader in wind power, is in charge of the development, construction, installation and operation of the offshore wind farm of the bay of Saint-Brieuc. It will cover a total area of 75 km<sup>2</sup>, will have a total capacity of 496 MW and will produce 1,820 GWh annually, equivalent to the annual electricity consumption of 835,000 inhabitants.

The wind farm, located 16,3 km off the French coast, is the first large scale offshore wind farm in Brittany and one of the first in France to obtain all the necessary government permits for its construction and operation.

The Saint-Brieuc bay offshore substation consists of a 63-meter-high jacket of 1,630 tonnes and 315 tonnes piles and a topside weighing approximately 3,400 tonnes. The topside is 55 meters long, 31 meters wide and 23 meters high.

Eiffage Métal is responsible for the engineering and construction of the steel structures for both the topside and jacket. All works will be performed in the production facilities of its subsidiary Smulders.

ENGIE Solutions in Belgium is in charge of the engineering, procurement, integration, construction and testing (on- and offshore) of all LV, MV, HV and auxiliary systems for the jacket and topside that will take place at the ENGIE Solutions yards.

Engineering and construction works have already been started for the topside and jacket. Sail away of both the topside and jacket is scheduled for the middle of 2022.

**About Eiffage**

*Eiffage is one of Europe's leading construction and concessions companies. The Group's activities are organised around the following business lines: construction, real estate and urban development, civil engineering, metal, roads, energy and concessions. Thanks to the experience of more than 72,500 employees, Eiffage generated revenues of €18.1 billion in 2019, of which almost 26% was outside France.*

**About Eiffage Métal**

*Eiffage Métal is the Eiffage group's brand dedicated to turnkey metallic construction. Eiffage Métal's teams contribute to the design and construction of building envelopes and façades, and steel structures. Specialized in multi-technical solutions, it is also an industrial actor, particularly in the offshore wind power sector. Present throughout Europe and internationally, Eiffage Métal employs more than 2,300 people and has 9 plants.*

**About ENGIE Solutions**

*ENGIE Solutions is the promise of a single point of contact and a combination of complementary energy solutions for cities and communities, industries and buildings. Our 9,600 experts are committed to results and are active in complementary fields such as cooling, industrial techniques, electricity, energy, mechanics, heating and cooling networks. Their common ambition is to accelerate the low-carbon transition of their customers by offering them complete and tailor-made support. ENGIE Solutions is part of ENGIE, the Belgian market leader in sales of electricity, natural gas and energy services. ENGIE Solutions counts 56 locations in Belgium and has an annual turnover of 2 billion euros.*
